

Question Bank of SE. (Soft. Engg.)
for University Examination.

Module 1 :-

- 1) Explain Evolutionary process model ? (5M)
- 2) What is agility ? Explain Kanban model. (10M)
- 3) Explain characteristics & nature of software. (5M)
- 4) Explain the Principles of Agile methodology ? Discuss the difference between Agile & Evolutionary Process Model ? (10M)
- 5) Explain V-Model in details ? (10M)
- 6) What is the difference betⁿ Prescriptive & Evolutionary model ? (5M)
- 7) Explain Agile methodology with XP Agile Development Process. (10M)
- 8) Explain Umbrella activities of s/w engg. (5M)
- 9) Explain the Process of CMM. (10M)
- 10) Differentiate betⁿ waterfall & spiral model. (5M)
- 11) Discuss Incremental model for s/w development with advantages & disadvantages. ~~(10M)~~ (5M)
- 12) Explain RAD Model with diagram. (5M)

- 13) Discuss prototyping model for sw development with merits & demerits. (5M)
- 14) With a neat diagram explain the spiral model of sw development. (10M)
- 15) Write a short note on SCRUM. (10M)
- 16) ~~16~~ What are major challenges in sw engg. (5M)

Module 2:-

- 1) What is feasibility study? (5M)
- 2) Write about the Non functional requirements for "Online Pizza ordering system." It should contains following:- a) Performance, b) Availability, c) Reliability, d) security, e) Maintainability. (5M)
- 3) Explain characteristics of SRS? Build an SRS Document for online student feedback system? (10M)
- 4) What is feasibility study? Discuss the different types of feasibility study? (10M)
- 5) Explain requirement elicitation in detail. (10M)
- 6) Discuss functional & non functional requirements. (5M)
- 7) Develop SRS for Hospital Management System which contains following:- (10M)
 - 1) Objective & scope.
 - 2) Product Perspective.
 - 3) Functional Requirement
 - 4) Non functional requirement.

Module 4:-

- 1) Explain Design Concepts. What is coupling & cohesion? What is expected more? why? (10M)
- 2) What are the different design principles. (5M)
- 3) Discuss about the principles of user interface design steps? (5M)
- 4) Explain different architectural styles? (10M)
- 5) Explain different types of coupling & cohesion? (10M)
- 6) Draw UML Use case diagram & class diagram for "Smart Agriculture Monitoring system." (10M)
- 7) Draw UML Component diagram & Deployment diagram for "college management system." (10M)

8) Discuss various types of design patterns. (10M)

Module 5:-

- 1) What are slw risks. (5M)
- 2) Explain various steps in Risk management with suitable diagram. Identify the risks associated with delayed projects (5M).
- 3) Define risk & explain IT project risk management processes. (5M).
- 4) Discuss different categories of risk that help to define impact values in a risk table. (10M)
- 5) Write a short note on RMMM for delayed projects. (5M)
- 6) Suppose you are the project manager of a large slw development project. Mention at least 3 reasons for your project delay. What are the risks associated with project delay? Perform Risk assessment & prepare RMMM plan for the same. (10M)
- 7) Explain SCM process in detail. (10M)
- 8) Write a short note on SCM process & explain how change control & version control are carried out in SCM. (10M)
- 9) Explain version control activities in SCM. (5M)
- 10) Explain change control activities in SCM. (5M)
- 11) Explain Mc Call's Quality factors? (10M)
- 12) Explain different metrics used for maintaining slw quality. (10M)
- 13) What is the difference betⁿ bug, error & defect explain with example. (5M)
- 14) Formal Technical Review (FTR) in details? (10M)
- 15) Explain in detail the SCM process & benefits of SCM. (10M)
- 16) Explain what is a risk? Different types of risk? & describe RMMM in detail? (10M)
- 17) Explain RMMM plan. (10M)
- 18) Explain Risk assessment & risk projection. (10M).
- 19) What is SCM? Explain SCM repositories. (10M).
- 20) Explain the review guidelines considered during FTR. (10M).
- 21) Explain walkthrough. (5M)
- 22) Compare FTR & walkthrough. (5M)
